

## **FS Connect signs Master Distribution Agreement for Sub-Saharan Africa with Canadian-based company, Sera4**

12 January 2021

FS Connect is excited to officially announce its partnership with Sera4 as the Master Distributor of their Keyless Access Control solution in Sub-Saharan Africa.

Sera4, a Canadian-based technology company which was founded in 2014, have expanded their presence into Central and South America, as well as the African continent offering a keyless access solution which provides centralized management of digital keys through the use of smartphones.

This partnership allows distribution and support of the Sera4 access control solution within South and Sub-Saharan Africa, enabling FS Connect to then also further support local businesses in offering the technology to their clients.

*"Sera4 is such an exciting product for the African market as it offers truly disruptive innovation that is transforming access control technology like never before. We see this as a great fit / partnership as we focus more and more on cloud-based infrastructure"* says Thabo Wessie, Managing Director of FS Connect.

*"We're thrilled to partner with FS Connect to bring secure, reliable, scalable keyless access control solutions to sub-Saharan Africa" says David Coode, CEO at Sera4. "We're committed to protecting critical infrastructure around the globe, and we're happy that FS Connect have selected us to round out their portfolio of security offerings."*

### **ABOUT FS CONNECT**

FS Connect, a Johannesburg based organisation offers solutions in the life safety and electronic security industry, mostly driven by larger 4IR themes such as cloud computing and services, Internet of Things (IoT), Artificial Intelligence, and Video Analytics.
